

DESIGN&BUILD WORKSHOPS

09.07 - 30.07.2017

Wrocław, Poland

Faculty of Architecture Wrocław University of Science and Technology and Faculty of Architecture and the Built Environment TU Delft presents:

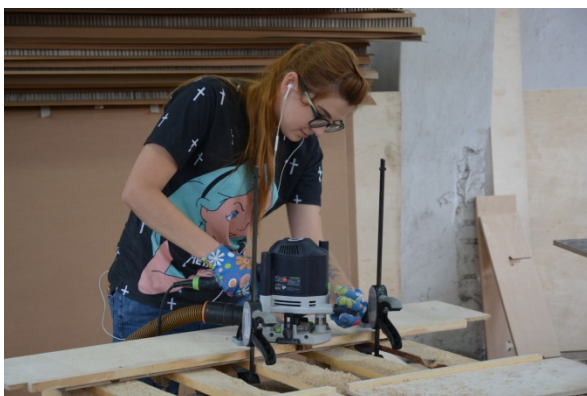

Summer School of Architecture 2017 Work&Chill is a course beyond the core of the curriculum at the faculties of architecture. During SSA students will be challenged to design and build a prototype in 1:1 scale of multifunctional units, that can serve as a place for relaxing, work, meetings.

www.ssa.pwr.edu.pl

Theme 2017

The theme of Summer School of Architecture 2017 Work&Chill refers to innovative, mobile, deployable, modular, comfortable and affordable solutions which will bring the answer to the need of certain social spots in the workplaces, making them more humanized and user friendly.

The results of SSA 2017 should be the unique and innovative architectural and engineering projects that will also refer to the social and psychological factors. Non-standard, innovative and bold solutions, but realistic, for execution are expected.

Students are working with the tools to construct their projects of Living Units, Summer School of Architecture 2016
