

## Pozvánka - letná škola - Viedeň

### Robotics Summer School

The Association of Automation and Robotics (<http://www.f-ar.at/>) in cooperation with University of Applied Sciences and Centauro Ltd (<http://www.centauro.at/>) organize a **Robotics Summer School** (24 Aug – 29 Aug, 2015) and would like to invite all who are interested in robotics and want to spend one exciting week in Vienna with people from all over the world.

The goal of the course is to provide students with hands-on laboratory experience, programming and offline simulation skills and to give them an introduction to novel technologies and trends in the area of industrial robotics. This hands-on programme provides participants with the opportunity of practical work with industrial robots (from market leaders such as ABB, Epson, FANUC ...) in small, collaborative teams with a teacher. Within programming and offline simulation sessions students will gain skills in simulators, such as DELMIA, ABB RobotStudio, Epson RC+, FANUC ROBOGUIDE, ...

The Robotics Summer School includes five-days of workshops, lectures and an excursion to an automation company. At the end of the course the participants will get a certificate for participation and great effort in gaining new robotic skills.

In addition to workshops of the Robotics Summer School an exciting social programme in Vienna can be provided on demand.
