

SLOVAK UNIVERSITY OF
TECHNOLOGY IN BRATISLAVA

STU LEARNING AND TEACHING FORUM

Bratislava, September 23, 2024

Dear colleagues,
we are delighted to invite you to attend the international conference

L&T Forum 2024

(Learning and Teaching Forum 2024),

dedicated to the current challenges and vision of engineering education.

Engineers have been changing the world for centuries. They create the future using science and invention. Today, more than ever before, economic growth is determined by the innovation capacities of a country and the capability of engineering study graduates to bring new, economically, environmentally and socially sustainable solutions.

With the STU partners and the EULiST universities, we will talk about the changes in the education of technology from national and European perspectives. We will focus on content and teaching and learning approaches, artificial intelligence in education, talent cultivation and attractive academic careers - important and engaging topics for all of us.

The L&T Forum 2024 conference will be held at the Slovak University of Technology in Bratislava on

November 7, 2024, at 9:00 a.m.

Aula of academician Bella

Faculty of Civil Engineering, STU in Bratislava, Imricha Karvaša 2

Conference under the patronage of Ministry of Education, Research, Development and Youth of the Slovak Republic. Registration for the event is available on the conference website (www.stuba.sk/english/ltforum).

We are looking forward to a comprehensive and beneficial meeting.
