

Dear colleges,

We represent educational and scientific team from Oles Honchar Dnipro National University, Ukraine. Our team specializes in the preparation of specialists for the enterprises of space industry. We have the potential and opportunities to conduct activities that meet the goals of the call as an associated country and we would like to discuss the possibility of creating a consortium to participate in HORIZON-CL4-2022-SPACE-01-72.

According to outcomes and Scope of HORIZON-CL4-2022-SPACE-01-72 the activities also involve the participation of Associated Countries, the participation of Ukraine as a country with significant opportunities and potential in the space industry can become an additional advantage of the consortium.

As part of a consortium, we can ensure the implementation of the following tasks:

- through cooperation with public and private aerospace companies in Ukraine analyze the needs of the trends of the Ukrainian market in specialists, analyze the necessary competencies and programmatic results of the Educational Programs;
- share the experience of training specialists in the aerospace industry in Ukraine;
- develop presentations, manuals, lecture courses to familiarize with the challenges in aerospace science and technology for a wide audience, popularize aerospace education among schoolchildren, familiarize a wide audience in Ukraine with the opportunities and achievements of the EU;
- perform a benchmarking of the career opportunities for space-oriented graduates coming from different universities across the EU-27 and Ukraine, carry out an assessment of the net inflows/outflows within EU-27 and Ukraine/Associated Countries and with non-EU countries;
- create course modules in relation to the 2 EU flagship constellations Copernicus and Galileo for jobs related earth observation and PNT, in particular for the downstream sector.

Among the potential participants in the project are leading professors, scientists and practitioners in the field of aerospace education, experts from the National Agency for Higher Education Quality Assurance of Ukraine and members of the Science and Methodological Commission on Engineering of the Ministry of Education and Science of Ukraine. Team members have extensive experience in R&D projects in this area.
