

ESPA UK (European Student Placement Agency) provides a **free service for European universities and students** who would like to do an **internship in the UK**. Our host companies cover the full range of industries and sizes, from start-ups to multinational corporations. Some of our current company clients are: Dyson, Castrol, Alfresco, Captec, MyDrive Solutions, etc.

It is our mission to develop partnerships with European Universities to find the proper candidate for our honoured receiving organisations. Your university represents the type of high quality education institution with which we would like to develop durable cooperation.

Period: Our internship programmes are normally designed for a period of 6 months.

Costs: The internships are unpaid but the accommodation, utility bills (water, gas, electricity & internet), and UK commuter travel to work will be paid by the host company. All these will be sourced and managed by ESPA. Students are recommended to apply for **Erasmus+** grants to cover their daily expenses.

If your university's programmes require the completion of a work placement abroad, we would be delighted of helping your students find their ideal internship in the UK
